

C/D AUDIO DXBT-05

WIRELESS ACTIVE NOISE CANCELING HEADPHONES

OWNER'S MANUAL

The **DXBT-05** Studio Grade Headphones are ideal for an active and busy lifestyle. Whether you're commuting to work, heading to the gym, or seeing the world abroad, these wireless headphones will immerse you in audio bliss while radiating an impeccable style-aura. The tuned, ergonomically shaped driver housings are powered by the same 40mm neo drivers as its predecessor, the DXB-03. The handcrafted black walnut housings deliver a naturally wide soundstage. The Active Noise Canceling filters out the unwanted noise when you're flying or riding — reducing it by up to 20dB. With its exceptional battery life of up to 12 hours, forgetting the charger for the day won't seem like the end of the world. With their soft leather adjustable headband and earpads you will enjoy comfortable listening hour after hour. Whether it's a podcast or a carefully crafted playlist, through the DXBT-05 headphones, everything is your soundtrack.

FUNCTION OVERVIEW

The DXBT-05 connect wirelessly via Bluetooth V4.0 to a variety of input devices.

Active Noise Cancelation is activated separately from the BT connection and uses little power. Providing a quiet place to concentrate or an uncluttered environment for your music or media.

FUNCTION OVERVIEW:

OPERATION

Noise Canceling:

1. Long press the **ANC** button, the **LED** indicator will turn green indicating the Noise Cancelation is active. (There may be a slight hissing noise, this is normal as the microphone adjusts to the environment and will dissipate after a moment.)
2. To turn off, long press the **ANC** button, the green will shut off on the **LED** indicator.

Note: **ANC** function can be used with a wired input, wireless input, or no input.

Wireless Operation:

1. Long press the **Multifunction** button, **red and blue LED** will flash and either go into pairing mode or pair with last device if in range. A four note tone scaling up will play through headset on startup, a confirmation tone will play when paired.
2. Enable the Bluetooth on your mobile phone or the device you want to connect and scan/search for DXBT-05.
3. When device is found, select and connect, you will hear a tone, and the **blue** indicator will flash, it will continue to flash every five seconds.
4. Long press the **Multifunction** button to power off the device. A four note scaling down will play and **LED** will flash red and blue.

Play Music:

1. Short press the **Multifunction** button to play media, another short press will pause media.
2. Short press the **Back Arrow** button to reduce the volume, long press to rewind to beginning of song, another long press to skip to previous.
3. Short press the **Front Arrow** button to increase volume, long press to advance to next song.

Call Functions:

1. Call Answer: Short press the Multifunction button to answer, and short press again to end.
2. Last number redial: Double press the **Multifunction** button to redial.
